Litigation Support

We provide a wide range of litigation support services such as witness locates, interviews, full background investigations, liability, wage loss and future wage loss investigation. We have extensive experience in testifying and presenting evidence in court and our Investigators have testified in both criminal and civil trials.

Open Source Analysis

Our Investigators specialize in background inquiries utilizing Open Source Analysis. This technique allows us to compile a profile of the Target which may include information such as address and contact information, business affiliations, criminal record or any associations, social activities as well as day to day activities. Photographs of the target as well as videos and any other information directly related to the target may also be obtainable. An Open Source Analysis can be utilized as an intelligence gathering technique in order to better direct other investigative measures such as surveillance or interviews. All information is court ready and within privacy guidelines.

Surveillance

Our surveillance teams are compiled of Investigators from various backgrounds including local police departments and specialized units and have conducted thousands of hours of successful surveillance. All Investigators are equipped with state of the art video, audio equipment and on board computers which allow for immediate transfer of up to date information. Our teams can be mobilized within minutes to assist with any situation.
